Concept Note :-

The Indian Knowledge System (IKS) represents a vast, ancient, and deeply rooted intellectual tradition that evolved over thousands of years in the Indian subcontinent. It encompasses a wide spectrum of disciplines, including philosophy, mathematics, astronomy, medicine, linguistics, arts, architecture, law, and spirituality. Rooted in the Vedic texts and further developed through centuries of scholarly inquiry, the Indian Knowledge System reflects a holistic worldview that integrates science, ethics, and metaphysics. In contemporary times, there is renewed interest in IKS due to its potential to offer alternative solutions to modern challenges, including mental health, environmental sustainability, education, and wellness. The Indian government and academic institutions are actively working to integrate IKS, through NEP 2020, into mainstream education and research, recognizing its relevance in the global knowledge landscape. Thus, the Indian Knowledge System is not just a relic of the past but a living tradition that continues to inform, inspire, and guide human progress through its comprehensive, integrative, and timeless wisdom. The present Faculty Development Program aims to address these concerns in some domains as mentioned below:
